Saint Agnes Medical Center

**Saint Agnes Medical Center
Nursing Student Float Process**

- Review the Hospital Profile document for guidance on the maximum number of students each unit can accommodate.
- Please be mindful that when units are orienting new staff, the maximum number of students in the clinical area may need to be adjusted. We will do our best to accommodate every request.
- Request floats via Computerized Clinical Placement System (CCPS) at the time you enter your course request, utilizing the Hospital Profile for guidance.
- Development & Support Services Department will review all float requests and approve or deny based on availability.
- Instructors may ONLY send students to approved float locations. Managers, Educators, or Practice Coordinators cannot approve new/additional float rotations. All additional requests must be made directly to the Development and Support Services Department.
- Once approved, reference the Hospital Profile for contact information of the float location. Email a copy of your float schedule, including student roster and course objectives, to the float area contact.
- Contact nursing.education@samc.com with any questions or concerns.
